YOUR SAFETY

Maritime Pipe Marking

Ships & Offshore platforms

Dear customers, partners and friends,

You have before you the latest edition of our Maritime Pipe Marking Brouchure, edition 2024-2025. In this brouchure you will find all the complete comprehensive information for the maritime pipe marking you need in accordance with ISO 14726.

Product development & innovation

During the past two years development and overall improvements have been done on our products in order to meet the strictest of maritime standards and at the same focus on the environmental foot print. New production equipment has been adapted to ensure an even higher quality, durability and increased production capacity.

Maritime Pipe Marking Implementaion

It is clear that a consistent and effective piping system is more than just marking of a single pipe. At Signwell we combine our decades of field experience and knowledge in implementing an effective and compliant pipe marking system. With a complete range of our high-quality markers that ensures a low total cost of ownership and ensures accuracy acc. to ISO 14726 you and your personnel will have an safe and effective work environment.

Signwell is a Finland established company that works within the offshore & marine industry for close to 30 years. Our services and products are being sold world wide. Our wide range of SOLAS safety products, IMO Safety - Signage, maritime pipe marking and other SOLAS safety products are of highest quality for the end users. With our modern production facility we are ready to realise fast deliveries & high quality products for our customers worldwide.

We deliver maritime pipe markings in various qualittites to meet the customers demands and the strictest of standards.

Are you in need for upgrading?

- New Generation IMO signs
- Electrical Powered Low Location Lighting Systems
- Photoluminescent Low Location Lighting Systems
- Signage and pipe marking solutions.

Contact our team today and get started: sales@signwell.fi

Furthermore Signwells Managing Director and Owner, has been elected as of 2024 as the new Chairman of the board for FSSA, The Finnish Ship Suppliers & Service Association, part of ISSA.

Martin Holmström
Managing Director, Owner
Chairman of the board, FSSA,

FSSA is part of the International Ship Suppliers & Service Association

FSSA (Sly, Suomen Laivakauppiaitten yhdistys ry.) is a fully recognized and integrated member of the ISSA, International Ship Suppliers & Service Association, which headquarters are based in London, UK. ISSA has its presence in 51 countries, 500+ Ports Locations, 1500+ Members and 40 National Associations.

Marking pipes on ships, offshore or onshore sites is essential to ensure safety at all times. Accidents, injuries and damage to machines and equipment can be caused by the fact your crew, operators or external maintenance engineers and intervention services are unaware of the risks of the substances that flow through pipes. The importance of marking pipes becomes clear when we look at the different standards & regulations that are currently active.

Standards & Regulations

Several regional or maritime organisations require compliance with pipe marking standards. Whether it is ISO 14726, ISO 20560-1, ANSI, AMSE A13.1, BSI 1710, DIN 2403, NORSOK or other company standards, we manufacture the correct and compliant pipe markers to meet these standards.

Because of this variety in global or regional standards, the new published ISO 20560 standard will realize a truly global, harmonized system of hazard recognition for pipemarking systems with uniformity of graphics, color-coding and formatting of safety messages. We can supply you with pipe markers meet the requirements of this new ISO 20560 standard.

Pipe marking requirements

The color, the color pattern, the size, the width, the content description, the letter size, the flow direction and the safety symbols differ from one standard to another. Our markers, regardless of the sector in which they are to be used, always comply with the latest applicable standards and requirements regarding legislation and regulations.

Where to apply pipe markings?

- At least one in every room for every pipe and every medium
- At frequent intervals on straight pipe runs, between 3 and 5 meter
- When pipes pass through the floor, ceiling or wall, mark both sides
- When pipes change direction
- In the proximity of each valve and pump

For particular surfaces or if the pipes have a too large diameter, it is also possible to provide individual pipe markers. This marker contains all the necessary information in accordance with legislation and regulations, such as color coding, medium name, safety symbols and possibly the direction of flow. These also differ per standard.

We manufacture pipe marking tapes for any purpose, maritime, offshore or onshore industrial plants. Our standard maritime pipe markers are available in 3 different qualities and can be fully customized to include all the necessary information needed, such as flow directional arrows, media, colour coding.

Signwell Economy Line (SEL) pipe marking

This pipe marking tape is an economic option, an un-laminated vinyl with a glossy finish. The pipe marker can be used both indoors and outdoors and is chemical resistant and weatherproof with a good life-span.

Signwell Basic Line (SBL) pipe marking

This pipe marking tape is a standard performance vinyl sandwich manufactured according to 3M™ MCS™ (Matched Component System™) production specifications. This tape comes with a glossy laminated finish and can be used outdoor and indoor in various types of environment. Thanks to the protective laminate, this pipe marker has a longer lifespan since the identification colours, flow-directional arrows and media text is protected by the laminate.

Signwell Premium Line (SPL) pipe marking

This PVC free pipe marking tape is a premium performance vinyl sandwich manufactured to endure the most hostile environments. This tape comes with a glossy laminated finish and can be used outdoor and indoor in various types of environment. Thanks to the protective laminate, this pipe marker has a longer lifespan since the identification colours, flow-directional arrows and media text is protected by the laminate.

Signwell Single colour pipe marking

Single color pipe marking tape is a tape which needs to be combined with the correct color coding. Additionally, a flow direction tape can be added to the combination to enhance identification.

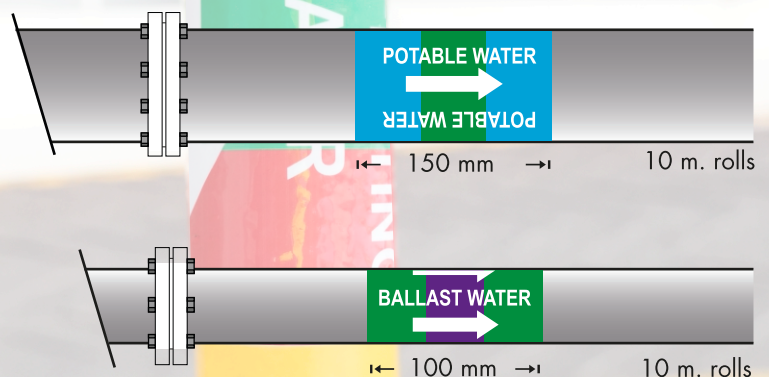

SINGLE COLOR PIPE MARKING

COLOR	DESCRIPTION	ARTICLE NUMBER
	Waste media	PMT050BK
	Fresh water	PMT050BU
	Fuel	PMT050BN
	Sea water	PMT050GN
	Non-flammable gases	PMT050GY
	Masses (dry and wet)	PMT050MN
	Oil other than fuel	PMT050OG
	Steam	PMT050BSR
	Fire fighting	PMT050RD
	Air in vent. systems	PMT050WH
	Flammable gases	PMT050YE
	Acids and alkalis	PMT050VT
	Flow direction	PMT050AR

ELEMENTS OF PIPE MARKING DESIGN

Our multi-colour pipe marking comes standard with medium text and flow direction. It is available in two sizes; 100mm and 150mm wide. The pipe marking can also be produced without text and flow directional arrows upon request.
